

Adaptive Training

Certification

Being Adaptive Certified validates your proficiency with Adaptive products, elevates your value within your organization, and helps you drive further professional success.

Certification Programs

Join the ranks of the Adaptive Certified and be recognized as the Adaptive authority within your organization. You'll demonstrate your proven expertise and gain the confidence to manage and grow your organization's deployment. With thousands of organizations already using Adaptive, being Adaptive Certified provides a strong professional foundation to grow your career and further success.

Certification Process

Certification is awarded to those who pass internet-based exams. Ongoing education opportunities and annual re-certification ensure that you're always up to date with the newest features and functionality.

ADAPTIVE PLANNING & ADAPTIVE REPORTING

To be Adaptive Planning and Reporting Certified, you must pass three exams. We recommend that you take the Adaptive

Planning Implementation training course and the related eLearning courses. You will be tested on foundational principles such as security and roles, populating the model, and creating and maintaining versions, as well as other topics such as sheet basics, formulas, performance, and more. The Adaptive Reporting Design and Administration class and related eLearning is

the perfect foundation for the reporting section of the exam, which covers matrix reports, modeled reports, calculations, attributes, formatting options, templates, and more.

"I'm looking forward to being Adaptive Certified! I've experienced so many benefits with Adaptive and I really want to expand my skill set and drive greater success for my company."

– Maria Manzano
Forecasting Manager, United Data Technologies

ADAPTIVE DISCOVERY PROFESSIONAL

To be Adaptive Discovery Professional Certified, you must pass one exam. The Adaptive Discovery Visual Design course and related eLearning are recommended preparation for this certification, which covers designing and customizing dials, creating role-based dashboards, security, and more.

ADAPTIVE OFFICECONNECT

To be Adaptive OfficeConnect Certified, you must pass one exam. Take the Adaptive OfficeConnect training course and related eLearning, and you'll have the answers to questions about building reports, formatting reports, linking to Word and PowerPoint, and other general topics the exam covers.
